

LEARN HOW TO MAKE CONTENT

PART 1 OF 3

Bio Set Up Guide

Instagram Bio Set Up (MAKE THIS CHANGE BEFORE POSTING 🚨)

Your bio should answer, in one glance:

- Who you are
- What you do / for who
- How to get in touch
- How you're connected to your team

Follow this exactly.

Step 1: Update your Name field

Format:

First Name Last Name | [Company Name]

Example:

Marcus Reed | [Company Name]

Step 2: Use this bio formula

Copy this, then fill in the brackets:

[Your role] at [Company Name] [Location] | Helping [who] [result] | DM "INFO" to apply

Keep it short, clear, and specific. No buzzwords. Don't use words that a rookie audience wouldn't understand (i.e. instead of saying "Golden Door," say "Awarded for being top 1% salesman in D2D")

Examples:

Regional Manager at [Company Name] Phoenix

Helping ambitious reps stack commission checks

DM "INFO" to apply

Team Lead at [Company Name] Utah

Helping new reps learn high commission sales

DM "INFO" to join the team

Step 3: Add the region page

Under your bio, add your team's handle as a link or tag.

Format:

 Follow our team: @yourteamhandle

Full Example:

Team Lead at [Company Name] Utah

Helping new reps learn high commission sales

DM "INFO" to join the team

Follow our team: @yourteamhandle

Step 4: Optional Changes

1. Set your website link to the official application / funnel link if you've made one
 2. "DM "INFO" to join the team" is optional as many of you aren't actively recruiting in the summer, but it should DEF be there when you're actually recruiting.
-

Final checklist

- Name field = "First Last | [Company Name]"
- Bio uses the exact formula from Step 2
- @yourteamhandle tagged in the last line

Filming Guide

How To Film Yourself With Your iPhone

IMPORTANT DISCLAIMER:

Your company's legal team may not allow the following to be posted on social media accounts. Check yours before you post:

1. **Interactions with customers**
2. **Videos of you saying the exact pitch**
3. **Any content related to “no soliciting” signs or how you overcome a “no soliciting” objection.**

As you create pieces of content, please make sure all clips and videos follow your company's legal policies.

1. How the scripts work

There are 2 types of lines in your templates:

1. Scripted lines (exact words)

- Usually the hooks and key sentences.
- **Say these word-for-word.** We wrote them to get views and keep people watching.
- You do NOT need to memorize the whole script.

1. How to film them:

- Read **one line at a time**.
- Look at the line, look back at the camera, say it.
- Messed up? Just say the same line again.
- When editing, you can cut out the mistakes and dead space.

1. “Yap session” sections

- These will say something like: “Go on a 20-minute yap sesh about [topic].”
- This is where you just **teach the principle in your own words**.
- Pretend you're on FaceTime with a new rep you're mentoring.
- Keep these SIMPLE

1. How to film yap sessions:

- Look at the topic + recommended time.
- Hit record and talk straight through.
- Don't worry about being perfect. Just be clear and real.
- If you totally lose your train of thought, stop, take a breath, and start that idea again.

2. Can you change the script?

Yes, we encourage you to **tweak the scripts** if something feels unnatural coming out of your mouth, or you would prefer to say things in another way.

Rules:

- DON'T CHANGE THE HOOK IF AT ALL POSSIBLE
- Keep the **same meaning and structure**
- Don't turn simple lines into long, confusing ones.
- If you're not sure, use our version. It's written to perform.

3. Basic filming checklist (every time)

Before you hit record, run through this:

1. Camera position

- Use the **back camera** whenever possible
- Phone **at eye level** (not under your chin).
- Frame: your **head and upper chest** in the shot, a little space above your head.

1. Lighting

- Face a **window** if indoors. Light should hit your face, not your back.
- If indoors at night, stand **under and slightly in front** of the brightest light in the room.
- Avoid:
 - Bright window **behind** you (you'll look like a silhouette).
 - Half your face in shadow unless it's on purpose.

1. Background

- Simple and clean
- No messy bed, laundry pile, or people walking around behind you if indoors

1. Sound

- Try to be in the quietest place possible
- Hold the phone **about an arm's length** away if you're filming yourself.
- Don't cover the microphones with your hand.

1. Energy

- Talk **10–20% louder** than you think you should.

BONUS: Here's a video we made on camera settings if you want the footage to be in the highest quality from your phone → [HERE](#)

Editing Guide

How To Edit With CapCut

Introduction

While we have tried to make the edits in these templates as simple as possible, you will need to know basic editing skills to make them. For more complex edits, we have linked 1-min walkthrough videos at the bottom of the template to help you. If you have ZERO experience editing with the CapCut app, here are some basic tutorials to help you get started.

CapCut Walkthrough → [HERE](#)

Generating Captions → [HERE](#)

The rest of the guides will be given *as needed* in the templates for which they are required.
