Recruiting Through Followers

Rookie Follower Scripts

Rookie Follower Scripts

MESSAGING WORKFLOW

Each conversation should follow the same pattern

1. Initial Message
2. VSL
3. Booking Link
4. Booked Call

With 8 follow ups in between each stage if they aren't responding. (That might seem extreme, but that's why you will get extreme results.)

NOTE: DON'T DO FOLLOW UPS AFTER THE FIRST INITIAL MESSAGE. ONLY DO FOLLOW UPS IF THEY HAVE ENGAGED WITH YOU AT LEAST ONE TIME ALREADY.

PURPOSE BEHIND EACH MESSAGE

ManyChat Message-

The entire purpose of this message is because overseas log ins cause security breaches to your instagram that could cause restrictions, so the only way that overseas help can message people is through Meta Business Suite.

The issue is there isn't a way to see or message new followers in Meta Business Suite, so you need the conversation to be generated for you.

If you are doing the messages yourself and/or have a USA-based assistant, please let us know and we will just turn this message off. (Conversions are higher when you don't need the ManyChat message)

Initial Message-

The purpose of the initial message is to provide context, create curiosity, and invite the prospect to learn more via your Native VSL.

Speed to response is really important for all messages, but especially for the initial message. The longer somebody waits between following you and having a conversation with you, the less likely they are to care about your conversation.

These messages are concise, but should feel personable, like you legitimately were just scrolling through IG and ran into them.

Native VSL-

Once the prospect agrees to receive the video, you should send them a 1-min VSL. Here are a few key points in sending your VSL.

1. Send it over to them as quickly as possible (this helps with engagement)
2. Send it **NATIVELY** in instagram (Don't send them any links, they should be able to just watch it in the DM chat. You do this by downloading the video and sending it from your photo library)
3. Send it on the Mobile App, not on a browser.
4. Video must be under 120 seconds long
5. Video must be less than 25MB

Our video- [Information for Sales Position](#)

Booking Links-

Once someone sends you a thumbs up from the VSL, you should send them your booking link with a brief message to encourage them to book in.

If you don't have a booking link already please set one up following this tutorial → [HERE](#)

Make sure you send the booking link and a message to encourage them to book. Make sure these are sent as two separate messages. If you clump it into one message, the encouragement message becomes less readable.

For Example-

Booking link msg 1 - *Sends booking link*

Booking link msg 2 - Here you go man. Go ahead and find a time that's convenient for you. Let me know if you have any difficulties finding a time.

WORD FOR WORD SCRIPT

Initial message -

Hey [Name], thanks for following. I'm sure you saw I run a sales team in the [industry] space. A lot of guys who follow me are wanting a good first opportunity. Most guys on our team are able to make around [\$XK/mo].

Cool if I send you a 1-min video that breaks down how the job works?

VSL Message -

Send this link => [Information for Sales Position](#)

Then send this message => "This is my hiring manager, let me know what you think."

Calendly Message -

Send your booking link →

Then send this → "Here you go man. Go ahead and find a time that's convenient for you. Let me know if you have any difficulties finding a time."

FOLLOW UP SCRIPTS

The importance of following up is PARAMOUNT to getting bookings.

When FUs are done correctly, people will often book in with you JUST because you followed up with them so much that they respect you and it helps them recognize that this opportunity is legitimate.

You should follow up with people EIGHT TIMES in both the VSL and Calendar Link stages before you let them go.

*You can also use these for people who are in your *initial message* stage, but ONLY if they message you first.

You want your follow ups to feel unique and humorous, to avoid annoying the prospect.

These are our follow up sequences that have worked very well.

FUP Chain (x8)

Here's what it looks like:

(B) FUP1: simple text

(B) FUP2: simple text

(B) FUP3: MEME + text

(B) FUP4: MEME + text

(B) FUP5: MEME + text

(B) FUP6: MEME + text

(B) FUP7: MEME + text

(B) FUP8: MEME + text

You might think 8 follow-ups is extreme. It is, but that's why we get extreme results :)

Follow-ups 1&2 should be sent within 12-24 hours of the previous message.

Follow-ups 3,4,5,6, 7 & 8 should be sent 48 hours after the previous message.

(B)FUP1 & (B)FUP2

These are simple text messages, voice notes or selfie videos just 'bumping' the last message. They don't require much thought or creativity. 3-6 words, simply trying to re-engage them to watch the vid, or tell us to go away.

Here are ours:

(B)FUP1:

- Thoughts on that firstname?

(B)FUP2:

- You still there firstname? 😊

(B)FUP3,4,5,6,7 & 8

These are slightly more 'cultured'. They require not only text, but a meme as well.

Memes are great as they break the pattern and introduce some humour.

Key points

- Should be relevant to your niche
- Should be funny, but the goal is to get a reply not make them laugh
- Should be appropriate

To create your memes, go here (you need to create 6, upload them to google drive):

[Meme Generator - Imgflip](#)

Here are some example memes for people in VSL Stage:

[Examples \(B\) Meme Followups](#)

And here are some example memes for people in the Calendly'd Phase:

[Examples \(C\) Meme Followups](#)

(yes, we actually have used these and they've generated us hundreds of appointments):

Accompanying Text

Each meme you've created should be accompanied with some short text or a voice note.

Example (as per the above meme examples):

3. Gotta warn you they're coming!! 😂

4. 🙄

5. just gonna drop this here...

6. I'm getting old here 😏
